PROFESSIONAL SUMMARY

Full-Stack Python Developer with hands-on internship and freelance experience building production-ready web applications, REST APIs, and database-driven solutions using FastAPI, Flask, React, TypeScript, PostgreSQL, MongoDB, and Supabase. Experienced in authentication, role-based access control, database design, responsive UI development, SEO, and cloud deployment. Proven ability to translate business requirements into scalable, maintainable applications from development through production deployment.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL

Frontend: React (Vite), HTML5, CSS3

Backend: FastAPI, Flask, REST APIs

Databases: PostgreSQL, MySQL, MongoDB

Authentication & Security: JWT Authentication, Supabase Auth, RBAC, OTP Verification

Tools & Platforms: Git, GitHub, Vercel, Render, Supabase, Linux

PROFESSIONAL EXPERIENCE

Software Developer Intern — Nutmeg Software Solutions, Hosur *Jan 2026 – Mar 2026*

Project: BI Analytics Platform | Tech Stack: Flask, MongoDB, Pandas, JWT, Twilio, SendGrid

- Built a Business Intelligence platform to process and analyze organizational datasets, enabling faster data-driven decision-making.
- Developed and deployed REST APIs to ingest CSV, Excel, and JSON data sources, streamlining data intake across departments.
- Implemented JWT-based authentication, OTP verification, and session tracking to strengthen platform security.
- Designed analytics modules for data aggregation and reporting, giving stakeholders clearer visibility into key metrics.
- Integrated third-party communication services (Twilio, SendGrid) to automate notifications and verification workflows.
- Increased data processing efficiency by building automated validation pipelines that reduced manual data-cleaning effort.

Freelance Full-Stack Developer — WildFloral, Hosur

Jul 2026 – Oct 2026

WildFloral Beauty & Fashion Studio | React | TypeScript | Vite | Supabase | PostgreSQL | Vercel

Live Demo: <https://www.wildfloral.online/>

- Designed and developed a production-ready full-stack web application for a beauty and fashion studio.
- Built responsive customer-facing interfaces for beauty services, fashion design, appointments, consultations, and enquiries.
- Developed customer and admin workflows for managing bookings, enquiries, services, and business operations.
- Implemented authentication and role-based access for customer and administrative functionality using Supabase.
- Designed and integrated PostgreSQL database workflows for customer data, bookings, enquiries, and application operations.

- Implemented SEO optimization with canonical URLs, structured data, robots.txt, XML sitemap, and Google Search Console integration.
- Deployed and configured the production application on Vercel with a custom domain, HTTPS, routing, and production environment.

PROJECTS

Student Project Collaboration Portal

FastAPI | React | PostgreSQL | SQLAlchemy | JWT — Live Demo: college-project-portal.vercel.app

- Designed and built a full-stack collaboration platform supporting Students, Mentors, and Administrators with role-specific workflows.
- Implemented JWT-based authentication and Role-Based Access Control (RBAC) to secure access across user roles.
- Engineered project lifecycle management, including project creation, join requests, approvals, mentor assignment, and completion tracking.
- Developed secure REST APIs using FastAPI and SQLAlchemy, following clean architecture and validation best practices.
- Optimized database performance through indexing and structured query design, improving response times for core endpoints.
- Integrated in-app messaging, profile management, and secure file upload functionality to enhance user experience.
- Deployed a production-ready full-stack application using Vercel (frontend) and Render (backend).

Face Recognition Attendance System

Python | Flask | OpenCV | MySQL

- Developed an AI-powered attendance management system using real-time facial recognition with OpenCV.
- Added geolocation-based attendance validation to improve accuracy and prevent proxy check-ins.
- Built duplicate-prevention logic to ensure reliable, error-free attendance tracking.
- Created administrative dashboards and reporting modules for attendance oversight.
- Enabled Excel-based report generation, giving administrators exportable attendance records on demand.

EDUCATION

Master of Computer Applications (MCA) <i>Adhiyamaan College of Engineering, Hosur, Tamil Nadu</i>	2024 – 2026
Bachelor of Commerce (B.Com) <i>MGR Arts and Science College, Hosur, Tamil Nadu</i>	2021 – 2024
Higher Secondary Education <i>Government Higher Secondary School, Hosur, Tamil Nadu</i>	2020 – 2021
Secondary School <i>Parimalam Matric Higher Secondary School, Hosur, Tamil Nadu</i>	2018 – 2019

CORE STRENGTHS

Problem Solving | Team Collaboration | Adaptability
